

# HEALTHCARE PROVIDERS

The **Omni 3750** with SoftPay enables healthcare providers to easily and securely collect payment and access important insurance benefits information.

**Auto-settle.** The solution can be programmed to automatically settle within 24 hours to ensure that providers qualify for the best discount rate.

**Imprint Card.** The clerk is reminded to manually imprint the card if the mag-stripe read fails. This allows the provider to qualify for charge back rights by following association regulations.

**Multiple Payment Types.** The Omni 3750 supports credit, debit and check authorization so providers can offer their customers a choice in payment methods.

**Fraud Control.** The solution supports account truncation and other measures to reduce fraud.

**Multi-provider Support.** Up to 99 separate provider ID's can be supported in the system, allowing for batch settlement and reporting options for independent owners operating under one roof.

**Debit Support.** Providers can offer ATM card transactions to consumers and save with lower transaction fees.

**Check Processing Options.** To reduce check fees, checks can be authorized using check service providers via split dial or through the primary processor.

**Card Ranging.** Payments are simplified because the software automatically prompts for the appropriate card type. Clerks don't have to remember different procedures for each card type.

## VALUE ADDED APPLICATIONS

- Check Authorization & Conversion
- Private Insurance & Medicaid Eligibility
- Time & Labor Management
- Employment Verification
